# Exercises on General Relativity TVI TMP-TC1 Problem set 6, due December 4th

#### Exercise 1 – Charge carrier on a table

Consider a charge carrier placed on a table in a flat spacetime. What are the conditions on the charge such that it radiates electromagnetic waves? What changes when you place this setup in a curved spacetime and let it fall freely? Imagine a power unit which prevents the table to fall and reconsider the situation.

### Exercise 2 – Charts on the 2-sphere

Consider the two dimensional sphere  $S^2$  and its realization in  $\mathbb{R}^3$  as:

$$\sum_{j=0}^{2} (x^j)^2 = 1 \tag{1}$$

Define coordinate neighbourhoods as follows

$$U_{j+} := \{ (x^0, x^1, x^2) \in S^3 | x^j > 0 \}$$
 (2)

$$U_{i-} := \{ (x^0, x^1, x^2) \in S^3 | x^j < 0 \}$$
(3)

On each of the neighbourhoods  $U_{i\pm}$  define a projection map, projecting out one of the coordinates, for example:

$$\phi: U_{0\pm} \longrightarrow \mathbb{R}^2 \tag{4}$$

$$\phi_{0\pm}(x^0, x^1, x^2) = (x^1, x^2) \tag{5}$$

and similarly for all other  $\phi_{i\pm}$  and  $x^i$  respectively. Calculate the transition functions  $\phi_{1-} \circ \phi_{2+}^{-1}$  and  $\phi_{2+} \circ \phi_{1-}^{-1}$  on the respective domains.

## Exercise 3 - Fun with Diffeomorphisms

(i) Show that the assignment given by

$$x \mapsto \frac{ax}{\sqrt{a^2 - x^2}} \tag{6}$$

defines a diffeomorphism between (-a, a) and  $\mathbb{R}$  with a positive real number a.

(ii) Define a diffeomorphism between the open ball

$$B_a := \{ x \in \mathbb{R}^n \mid ||x|| < a \} \tag{7}$$

and the entire  $\mathbb{R}^n$ .

(iii) Find a smooth function  $f: \mathbb{R}^n \to \mathbb{R}_0^+$  with the following properties:

$$f(x) = 1 x \in \bar{B}_1 (8)$$
  

$$f(x) = 0 x \in \mathbb{R}^n \setminus B_2 , (9)$$

$$f(x) = 0 x \in \mathbb{R}^n \setminus B_2 , (9)$$

where  $\bar{B}$  denotes a closed ball.

#### **General information**

The lecture takes place on Monday at 14:00-16:00 and on Friday at 10:00 - 12:00 in A348 (Theresienstraße 37).

Presentation of solutions:

Monday at 16:00 - 18:00 in B 138

There are six tutorials:

Monday at 12:00 - 14:00 in A 249

Thursday at 16:00 - 18:00 in A 449

Friday at 14:00 - 16:00 in C 113 and A 249

Friday at 16:00 - 18:00 in A 249
